 Portfolio

Education

B.Tech in Information Technology

ABES Engineering College — CGPA: 7.1

2023–2027

Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, WebSockets

Database: MongoDB, MongoDB Atlas

DevOps & Tools: Git, GitHub, Docker, Postman, npm, Vercel, CI/CD

Cloud: AWS (Basics), Firebase

Domains: Full-Stack Development, SaaS Development, DevOps Monitoring

Projects

CredLens – AI Spend Optimization Platform — Live Demo

2026

Tech Stack: Next.js, Node.js, MongoDB, Resend, Tailwind CSS, REST APIs, Vercel, SaaS Development

- Engineered a full-stack SaaS application that analyzes AI spending data, generates optimization recommendations, and delivers executive summaries to help organizations reduce operational costs.
- Developed an audit pipeline with PDF/CSV export functionality, multi-currency normalization, and email delivery via Resend, reducing report generation time from hours to under 60 seconds.
- Integrated MongoDB-backed persistence, third-party services, live audit synchronization, and shareable workflows through a responsive Next.js interface deployed on Vercel.

Docker DevOps Dashboard — Live Demo

2025

Tech Stack: Node.js, Express.js, React.js, MongoDB, Docker, Dockerode, WebSockets

- Created a DevOps dashboard for container orchestration, lifecycle management (start, stop, restart), and infrastructure visibility using Docker APIs and Dockerode.
- Implemented WebSocket-based log streaming and system performance tracking, supporting multiple concurrent services with low-latency updates and operational insights.
- Designed interactive infrastructure visualizations to monitor resource utilization, deployment status, application health, and operational metrics through a responsive React-based interface.

Faculty Feedback Automation – Web-Based Evaluation System

2024

Tech Stack: HTML5, CSS3, JavaScript (ES6+), REST APIs

- Developed a role-based academic evaluation system serving 200+ students, streamlining assessment workflows and reducing manual processing time by approximately 70
- Crafted a responsive user interface using HTML5, CSS3, and JavaScript, improving usability and simplifying the submission process for students and administrators.
- Integrated faculty evaluation forms, reporting dashboards, REST API connectivity, and data-driven reporting features to support academic decision-making.

Certificates

Full-Stack Development 101 — Simplilearn (Jan 2025)

Extracurricular

Smart India Hackathon (SIH) 2024 — Participant

Collaborated with a multidisciplinary team to develop and present a solution for a real-world problem statement in a competitive hackathon environment.

College Event Coordination — Assistant

Assisted with planning, logistics, and teamwork activities for college events.

Self-Directed Technical Learning — Personal Projects & Online Courses

Engaged in continuous technical upskilling through online courses and personal development projects.
